

INTERNET AND LAN AT MAIDANAK OBSERVATORY

YUSUF TILLAYEV

SH. EHGAMBERDIEV, O.BURKHONOV, D. ALEKSEYEV, B. HAFIZOV (UBAI)

M.KARDASHENKO (ANC, VSAT AT MAO)

MUM-6, November 1-3, 2021

CONTENTS

- Introduction:
 - Status April 2018
- VSAT internet
- New optic LAN and extended Wi-fi coverage
- New internet connection via base station of a mobile service provider
- Future plans

INTRODUCTION: THE APRIL 2018 STATUS OF THE MAO LAN AND INTERNET CONNECTION

- LAN was mainly wireless
- There was no mobile service base stations at MAO
- Internet connection came from remote base station using 3G modem and outdoor antenna. Uzmobile CDMA mobile service provider, bandwidth was around 153 kbps/512 kbps
- VSAT internet was going to be installed by ANC (Moscow, M.Kardashenko)

NEW VSAT AT MAIDANAK

- Was installed in June 2018
- Bandwidth:
 - 256 kbits/sec uplink
 - 2048 kbits/sec downlink
- Traffic limit is 5Gb/month

NEW FIBER-OPTIC LOCAL AREA NETWORK:

- Completely new fiber-optical network
- Connected 14 locations of MAO into one LAN.
- FO runs underground,
- Total length is more than 4 km

NEW FIBER-OPTIC LOCAL AREA NETWORK:

- 1. Eastern Zeiss-600 telescope
- 2. Zeiss-1000
- 3. Eastern House (small)
- 4. Eastern House (large)
- 5. Main House
- 6. Southern Zeiss-600 Telescope
- 7. AZT22 (4th floor)
- 8. AZT22 (2nd floor, used for the Internet from Uztelecom)
- 9. DIMM (western station)
- 10. Astrotel (Satovsky)
- 11. DIMM (eastern station)
- 12. Guards house
- 13. Refractor telescope
- 14. Southern dome near to Zeiss-600-South (empty, for new telescopes)

NEW FIBER-OPTIC LOCAL AREA NETWORK (CONT.)

- The central node is located in the server room (server room is the one closest to the Northern Zeiss-600)
- 100 mbps FO-TP media converters were used originally to connect PC's, wi-fi AP's, IP-phones and other network equipment. Now it is being upgraded to gigabit network equipment

WI-FI EXTENSION OF THE WIRED LAN

- Every node of the wired LAN is being provided with a Wi-Fi AP to extend the LAN. This is very convenient for mobile users (smartphones and laptops)
- We are going to use one single SSID and password for entire observatory
- All AP's will be controlled by a single central Wi-Fi controller

MOBILE SERVICE PROVIDERS AT MAO

- Uzmobile service provider installed its base station in 2018 to the south-west of the AZT-22
- Beeline mobile service provider installed its base station in 2019 to the west of the AZT-22

SERVER AND INTERNET SHARING

- Server is located in the dedicated room nearby NT-Zeiss600
- Kerio controller used for internet sharing
- Until recently two sources of internet was shared into LAN (2 gateways):
 - 3G internet of Uzmobile (up to 3mbps) using a USB-modem
 - VSAT-internet
- Since Oct 21, 2021 3G internet was replaced by the connection to BS of Uzmobile (up to 6 mbps)

NEW INTERNET CONNECTION VIA UZMOBILE BS

- Direct connection to the base station of Uzmobility
- The speed we use is limited by the stream coming to the BS (not by price of the tariff plan (30 USD per month))
- Nowadays the stream corresponds to the tariff plan “Corporate-2”

MAO METEOSTATION DATA AVAILABLE ONLINE

- <https://app.weathercloud.net/d5359208089#current>

The screenshot shows the weathercloud app interface for Misol MAIDANAK. The top bar features the weathercloud logo. Below it is a weather icon showing a windmill and clouds. The location is Misol MAIDANAK, with coordinates 38° 40' 43" N 66° 53' 37" E and an elevation of 2593 m. The data was updated 8 minutes ago. The interface includes navigation icons for Dashboard, Twitter, Follow, and Share. The main display shows a large question mark icon, indicating that some data is not available. The current temperature is -3°C, and it feels like -6°C. The wind speed is 1.5 m/s S, and the temperature is -3.3°C. The bottom of the screen shows sunrise at 6:59 AM, sunset at 5:35 PM, and a waning crescent moon.

ACKNOWLEDGEMENTS

- Prof.Ehgamberdiev – high level negotiations on MAO internet
- Dima Alekseyev, IT engineer of UBAI, spent almost 5 months in a row at MAO this year
- Otabek Burkhonov – contacting ICT ministry, control of local cabling work etc.
- B.Hafizov – local technical work and maintenance
- M.Kardashenko and ANC – VSAT at MAO
